

Rajesh Uriti

Full-Stack Application Architect

+1-(502)-807-9789

rajeshuriti@gmail.com

[LinkedIn](#)

Mississauga, Ontario

PROFESSIONAL SUMMARY

- Experienced **Application Architect** With **15+ years** of expertise in architecting and developing end-to-end solutions across the full Software Development Life Cycle (SDLC).
- **Versatile Full Stack Developer:** Proficient in both **front-end and back-end development**, with experience in building robust solutions.
- **Architecture Leadership:** Led application architecture design, technology stack decisions, and system modularization to align with business goals and ensure long-term maintainability.
- **Database Management Expertise:** Extensive experience in database management, integrating **SQL Server, PostgreSQL**, and efficient ETL processes to ensure seamless data handling and performance.
- **Proficient in utilizing cloud solutions**, with expertise in **AWS services** like **EC2, S3, FSx and Lambda** to design scalable, cost-effective cloud architectures that enhance performance and resource efficiency.
- **Streamlined Deployment:** Automated deployment using **CI/CD pipelines** with **GitHub Actions**, ensuring efficient integration, testing, and deployment across environments. Leveraged **Docker** for containerization to maintain consistency across development, staging, and production.
- Extensive experience with **version control systems** such as **GIT, SVN**, and **TFS**, managing code repositories, branching, merging, and ensuring smooth collaboration in team environments.
- **Team Leadership:** Provided technical direction to cross-functional teams, performed code reviews, and ensured adherence to architecture and coding standards.
- Proficient in facilitating **customer and business communication** to address technical issues.
- Hold **Canadian Permanent Residency (PR)**, authorized to work in Canada without sponsorship.

SKILLS:

- ✓ **Programming:** .NET Framework, .NET Core, Python, ML.NET, Gen AI.
- ✓ **Web Development:** Angular, jQuery, HTML5, CSS3, JavaScript, TypeScript.
- ✓ **Database Management:** SQL Server, PostgreSQL, SSIS.
- ✓ **Cloud & SaaS/PaaS:** - AWS (EC2, S3, Lambda, IAM, ECR, ECS, FSx).
- ✓ **IDE:** Visual Studio 2022, Visual Studio Code, PyCharm.
- ✓ **Version Control:** GIT, SVN, TFS.
- ✓ **Methodologies:** Agile, Waterfall.
- ✓ **Design Tools:** Figma, Canva
- ✓ **Tools & Testing:** Figma, Docker, Postman, Soap UI, Locust.
- ✓ **API & Testing Tools:** Postman, Bruno, Soap UI, Locust
- ✓ **CMS Tools:** Sitecore, Maximo.
- ✓ **Monitoring Tools:** Confluence, Hangfire, Dynatrace.
- ✓ **Code Quality:** Sonar Lint, SonarQube.
- ✓ **Deployment:** GitHub Actions.

Work Experience

Company – Cognizant

Duration: Jan 2019- Till Date

Client – NextEra Energy

Location: Mississauga, ON & West Palm Beach, FL

Project – Digital Worker:

Designed and developed a comprehensive project management application, aimed at streamlining the entire lifecycle of planning, execution, risk assessment, and Safety processes, etc...

The application provided a centralized platform for managing complex projects, allowing teams to collaborate more effectively and track progress in real-time. Key features included customizable project templates, task management, milestone tracking, and automated reporting.

Project Leadership and Development Highlights:

- **Led end-to-end application architecture design**, including system modularization, technology stack selection, and integration strategies; collaborated with stakeholders to gather requirements, define scope, and translate business goals into scalable technical solutions.
- Architected and developed a full-stack enterprise application using **.NET Core** and **Angular**, ensuring scalable and high-performance system design.
- Led architectural design and modularization of application into microservices, improving **maintainability, scalability, and deployment** velocity.
- Designed database schema, stored procedures, and data pipelines in **PostgreSQL** and **SQL Server**, optimizing complex queries and ETL workflows via **SSIS**.
- Built CI/CD pipelines using **GitHub Actions**, enabling automated code integration, testing, and deployments across multi-environment infrastructure.
- Spearheaded containerization using **Docker**, streamlining dev-test-prod workflows and maintaining consistent environments.
- Designed and implemented AWS-based infrastructure using **EC2, Lambda, S3, DMS** and **FSx**, ensuring high availability, cost-efficiency, and auto-scaling capabilities.
- Used **Python** for automation and test script development, focusing on performance testing (via Locust) and operational scripting.
- Worked in both **Agile** and **Waterfall** environments to deliver features in iterative sprints while maintaining long-term architectural integrity.
- Led **cross-functional** development teams, providing **technical direction, reviewing code**, and ensuring alignment with architectural standards and project timelines.
- Leveraging **Generative AI tools** to accelerate development, enhance code quality, and increase productivity through intelligent code suggestions and automation.
- Defined **test strategies** and deployment plans, coordinating with QA, DevOps, and release teams to ensure smooth transitions between environments and reliable production releases.

Company – Cognizant

Duration: Mar 2017 – Dec 2018

Client – Direct Energy

Location: Houston, TX

Project – Simplified Enrollment System:

Developed a Simplified Enrollment System for a Power and Utilities Company, streamlining the enrollment process for enhanced efficiency and user experience.

Development Leadership and Application Highlights:

- Led the development of an ASP.NET MVC application, designing flexible architecture with Web APIs for seamless user enrollment and renewal.
- Worked with .NET Framework and Angular to develop scalable applications.
- Worked on SQL Server, creating and optimizing stored procedures, triggers, and functions.
- Gained experience working with both AWS and on-prem environments for cloud and infrastructure management.

Company – Tata Consultancy Services

Client – Humana

Duration: Sep 2012 – Mar 2017

Location: Louisville, KY

Project – Centralized ID Card System:

Implemented a seamless integration of the ID Card System with multiple departmental applications within the network. This enhancement empowers end-users to effortlessly generate centralized ID cards, streamlining the overall identification process.

Roles and Responsibilities

- Played a key role in project planning, providing detailed work estimates, and developed a website using .NET Framework, Angular, and jQuery for seamless frontend and backend integration.
- Created dynamic pages, items, and templates while implementing routing and rule-based personalization within the application architecture.
- Designed the application with Angular and Bootstrap for enhanced visual experience and improved responsiveness.

Company – ATOS Syntel

Client – Humana

Duration: Feb 2010 – Aug 2012

Location: Pune, MH

Project – Physician Finder:

Physician Finder is an innovative application designed to help users locate physicians based on their insurance plans. The application provides a seamless and user-friendly experience. The integration of Google APIs enhances functionality, offering detailed directions to the chosen physician.

Roles and Responsibilities

- Engaged in end-to-end development, contributing to both the front-end and back-end aspects of the application.
- Responsible for designing and managing the database, ensuring efficient data storage and optimal performance.

Company – Cyient Limited

Client – Cyient Limited (In-House Project)

Duration: May 2009 – Jan 2010

Location: Hyderabad, TN

Project - Costing and Tracking Solution:

An In-House Project streamlines project tracking and costing with module design, coding, and ongoing maintenance support.

Roles and Responsibilities

- Gaining a solid understanding of the project's architecture and requirements.
- Documenting code, processes, and project-related information.

ACADEMIC PROFILE

- Master of Computer Application - Ideal College of Arts & Sciences, Andhra University
- B.Sc. Computers - AGL degree College, Andhra University
