PROFILE

- **Experienced Application Architect & Full-Stack Developer** with **16+ years** designing and delivering end-to-end solutions across the full SDLC, skilled in both front-end and back-end development.
- **Strong Cloud & Architecture Expertise:** Demonstrated deep expertise in cloud architecture and technology strategy, designing scalable and cost-efficient AWS solutions using services like EC2, S3, FSx, and Lambda.
- **Database Management:** Strong experience with SQL Server and PostgreSQL, designing and optimizing database schemas and queries for high performance and reliability.
- **DevOps & Deployment Automation:** Implemented CI/CD pipelines with GitHub Actions and containerized applications using Docker to streamline deployment across environments.
- **AI & Generative AI Specialist:** Applied Generative AI technologies and worked extensively with AI agents and copilot tools to accelerate development and enhance software solutions.

WORK EXPERIENCE

Cognizant Technology Solutions

JAN 2019 - PRESENT

Full-Stack Application Architect

MISSISSAUGA, ON & WEST PALM BEACH, FL

- Designed end-to-end application architectures, including modularization, tech stack selection, and integration strategies aligned with business goals.
- Developed scalable full-stack enterprise apps using .NET Core and Angular, with microservices-based architecture for flexibility and performance.
- Engineered robust database solutions with PostgreSQL and SQL Server, optimizing queries and ETL pipelines using SSIS.
- Built automated CI/CD pipelines with GitHub Actions, enabling seamless integration, testing, and deployment across environments.
- Architected AWS infrastructure using EC2, ECS, Lambda, S3, DMS, and FSx for high availability, scalability, and cost efficiency.
- Utilized Python for automation and testing, including performance testing with Locust and scripting operational tasks.
- Led architecture strategy and provided technical leadership, guiding cross-functional teams, enforcing best practices, and ensuring scalable, maintainable solutions.
- Leveraged Generative AI tools to accelerate development, enhance code quality, and boost team productivity through intelligent automation.
