PROFESSIONAL SUMMARY

Solution Architect and Senior Software Engineer with 16+ years of experience designing, modernizing, and delivering enterprise-scale customer-facing applications across the full Software Development Life Cycle (SDLC). Proven expertise in Solution Architecture, Enterprise Application Development, Systems Analysis, Cloud-Native Solutions, Microservices Architecture, API Design, and Digital Transformation initiatives.

Successfully architected and delivered 12 enterprise applications supporting thousands of users across business-critical functions. Led technology modernization, cloud adoption, and application transformation initiatives while providing technical leadership to cross-functional teams of 25+ engineers, driving scalable, secure, and highly available solutions using .NET, Angular, AWS, CI/CD, and modern engineering practices.

Architected and integrated Generative AI solutions leveraging Anthropic Claude, OpenAI GPT, Google Gemini, Retrieval Augmented Generation (RAG), Prompt Engineering, Semantic Search, and AI-assisted automation patterns. Delivered AI-powered solutions enhanced software delivery, accelerated knowledge discovery, improved operational efficiency, and enabled intelligent business process automation. Skilled in evaluating enterprise AI use cases, selecting appropriate LLM technologies, and designing scalable, secure, and business-aligned AI solutions.

CORE COMPETENCIES & TECHNICAL SKILLS

Programming & Frameworks

- C#, .NET Framework, .NET Core, ASP.NET MVC, Python, Fast API

Frontend Technologies

- Angular, JavaScript, TypeScript, HTML5, CSS3, jQuery

Architecture & Design

- Solution Architecture, Enterprise Architecture, Systems Analysis, Design Patterns, SOLID Principles, Microservices Architecture, SDLC

Generative AI & AI Engineering

- Anthropic Claude SDK, OpenAI API, Google Gemini
- Prompt Engineering, Prompt Optimization
- Retrieval Augmented Generation (RAG)
- AI Agents & Workflow Automation
- LLM Evaluation, Response Optimization

APIs & Integration

- REST APIs, ASP.NET Web APIs, JSON, Integration Patterns, Messaging Queue Concepts

Databases

- SQL Server, PostgreSQL, SSIS, MongoDB (Working Knowledge), NoSQL Concepts

Cloud & DevOps

- AWS (EC2, S3, Lambda, ECS, ECR, FSx, IAM, DMS)
- Docker, GitHub Actions, CI/CD

Development Tools

- Visual Studio 2022, VS Code, PyCharm, Git, SVN, TFS

Testing & Quality

- Postman, Bruno, SoapUI, Locust, SonarQube, Sonar Lint

Monitoring & Collaboration

- Confluence, Dynatrace, Hangfire

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions | Full-Stack Application Architect | Jan 2019 – Present

- Served as Solution Architect and Technical Lead for 12 enterprise-scale customer-facing applications supporting planning, execution, risk assessment, compliance, safety, and reporting processes for thousands of users across multiple business functions.
- Directed application architecture, modernization, and technology transformation initiatives using C#, .NET Core, Angular, REST APIs, and Microservices Architecture, transforming tightly coupled applications into a scalable ecosystem of 18 microservices while applying SOLID principles and enterprise design patterns.
- Conducted systems analysis, technical feasibility assessments, architecture reviews, and stakeholder workshops to align technology investments with business objectives and strategic roadmaps.
- Optimized SQL Server and PostgreSQL platforms, ETL workflows, and data integration processes while architecting AWS-based cloud solutions and CI/CD pipelines using GitHub Actions and Docker to improve scalability, reliability, and deployment efficiency.

- Provided technical leadership, architecture governance, mentoring, and engineering best practices across cross-functional teams of 38+ developers, QA engineers, and DevOps professionals.
- Drove enterprise AI adoption through evaluation and integration of Anthropic Claude, OpenAI GPT, and Google Gemini and developed AI-powered applications using Python, Anthropic SDK, OpenAI APIs, Retrieval Augmented Generation (RAG), semantic search, vector embeddings, and prompt engineering techniques.
- Delivered AI-assisted automation and knowledge retrieval solutions while assessing model performance, latency, security, scalability, and cost considerations to support responsible and effective AI adoption.

Cognizant Technology Solutions | Senior Software Engineer | Mar 2017 – Dec 2018

- Led development of ASP.NET MVC and Angular-based enrollment platforms for utility customers.
- Designed Web APIs and scalable application architectures supporting business growth and future enhancements.
- Optimized SQL Server stored procedures, functions, and database performance for transactional systems.
- Participated in requirements analysis, project planning, estimation, systems analysis, and technical solution design.
- Worked across AWS and on-premises infrastructure environments supporting enterprise deployments.

Tata Consultancy Services | Application Developer | Sep 2012 – Mar 2017

- Developed enterprise healthcare applications using .NET Framework, Angular, JavaScript, and SQL Server.
- Participated in project planning, technical analysis, effort estimation, and enterprise application development.
- Designed reusable application components and responsive user interfaces.

ATOS Syntel | Software Engineer | Feb 2010 – Aug 2012

- Developed full-stack healthcare applications, database solutions, and Google API integrations while supporting production environments.

Cyient Limited | Software Developer | May 2009 – Jan 2010

- Contributed to enterprise application development, maintenance, testing, troubleshooting, and technical documentation.

EDUCATION

Master of Computer Applications (MCA) – Andhra University

Bachelor of Science (Computers) – Andhra University
